Genes were identified by a combination of several methods: Gene prediction programs including Genscan+ (Chris Burge, http://CR-081.mit.edu/GENSCAN.html), GeneMarkHWM (Mark Borodovsky, http://GR-081.mit.edu/GENSCAN.html), GeneMarkHWM (Mark Borodovsky, http://www.tigr.org/softlab/glimmerm.htm/glimmerm.html, and GeneSplicer (Mihaela Pertea and Steven Salzberg, contact mpertea@tigr.org), searches of the complete sequence against a mpertea@tigr.org), searches of the complete sequence against a peptide database and the plant EST database at TIGR (http://www.tigr.org/tdb/cgi.shtml). Annotated genes are named to indicate the level of evidence for their annotation. Genes with similarity to other proteins are named after the database hits. Genes without significant peptide similarity but with EST similarity are named as unknown proteins. Genes without protein or EST similarity, that are predicted by more than two gene prediction programs over most of their length are annotated as
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Arabidopsis thaliana

Hamilton Walk, Philadelphia, Pennsylvania 19104-6018, USA
* NOTE: This is a 'working draft' sequence. It currently
* consists of 13 contigs. The true order of the pieces
* is not known and their order in this sequence record is
* arbitrary. Gaps between the contigs are represented as
* runs of N, but the exact sizes of the gaps are unknown.
* This record will be updated with the finished sequence
* as soon as it is available and the accession number will
                           969 GGAAAGCTTGTTTGGGATACCACAAAACCAGGAGGACACCAAGGAAACTGATGGATAGC

L. Submitted (03-AUG-2000) Plant Gene Expression Center, 800 Buchanan Street, Albany, CA 94710, UBA

On Jul 29, 2000 this sequence version replaced gi:884119.

The sequence is of BAC F2H15 from Arabidopsis thaliana chromosome

1. The sequence does not represent the sequence of the entire insert of this clone. It is shorter by 26271 bp because we submit only the unique sequence of the clone. However, in order to facilitate the joining of overlapping clones in the future, for creation of larger contigs, we provide small overlaps (200 bp) between overlapping submitted clones. The 5' end of this sequence overlaps by 200 bp to the 3' end of the sequence of the clone Fila6.

Fila6. The 3' end of this sequence overlaps by 200 bp to the 5' end of the sequence of the clone Fila6.
                                                                                                                                                                                                                                                                            Sequence of BAC F2H15 from Arabidopsis thaliana chromosome 1,

NOTE: It currently consists of 1 contigs. Gaps between the contigs are represented as runs of N. The order of the pieces is believed to be correct as given, however the sizes of the gaps between them are based on estimates that have provided by the submitter. This sequence will be replaced by the finished sequence as soon as it is a vailable and the accession number will be preserved.
* NOTE: This is a "working daraft' sequence.

Physicomitrella patens

Bukaryota; Viridiplantae; Streptophyta; Embryophyta; Bryophyta;

Bryopsida; Funarilae; Funariales; Funariaceae; Physicomitrella.

Bryopsida; Funariales; Funariales; Funariaceae; Physicomitrella.

Lerchl, J., Renz, A., Ehrhardt, T., Reindl, A., Cirpus, P., Bischoff, F., Frank, M., Freund, A., Duwenig, B., Schmidt, R.M. and Reski, R.

Mass genes from physicomitrella patens encoding proteins involved in the synthesis of carbohydrates

Patent: WO 0144476-A 147 21-JUN-2001;
